

Software and Printer Support

Print quality is poor.

Printer: TT230 Series with LCD panel

Be sure you are using the driver for the newer TT230 series printer with LCD screen.

- 1 **OPTION 1:** Click the **Windows Start** button and select **Devices and Printers**. Right-click your printer's driver and select **Printing Preferences**. Click on the **Graphics** tab. Set **Dithering** to None. Click OK. Restart TagPrint Pro. Try printing to see if the issue is resolved.
- 2 **OPTION 2:** Click the **Windows Start** button and select **Devices and Printers**. Right-click your printer's driver and select **Printing Preferences**. Click on the **Options** tab. Uncheck "Use Current Printer Settings." Change **Print Speed** to 2.00 in/sec and move the **Darkness** slider to 12. Try printing to see if the issue is resolved.
- 3 **OPTION 3:** Remove ribbon and gently clean print head with alcohol and a cotton swab. Replace ribbon. Try printing to see if the issue is resolved.
- 4 **OPTION 4:** Ensure it is a HellermannTyton printer ribbon and correct type for the stock being printed. If unsure, contact **Tech Support**.
- 5 On LCD select **Menu**. Select **Diagnostics**. Select **Printhead**.
- 6 If the result is there are bad dots, print head may need to be replaced.
- 7 If the problem still exists, please contact **Tech Support** for possible Repair.
